

Aaron Miller

Full Stack Software Engineer

1710 NW 57th St. Apt. 501
Seattle, WA 98107
(206) 409-2846
aaaronmiller@gmail.com

OBJECTIVE

I would like to join a company where I can utilize my computer skills and technical knowledge to assist in the design and implementation of modern web applications and pages. In addition to design, I am also proficient in all aspects of computer hardware and system maintenance (Windows, Macintosh and Linux). With my Bachelor's Degree from the University of Washington and background both running my own company and contracting my services to others. I feel my experience makes me an ideal candidate for a position which makes use of both my technical and social expertise.

EXPERIENCE

2FIX.US, Seattle, WA —Lead Front End Developer

June 2014 – PRESENT

Located website clients and determined their desired project goals and functionality. Designed initial concepts, then following approval developed and produced the alpha product. Discussed proposed changes and executed them when appropriate. Followed up with SEO, maintenance and content update when requested. Utilized Visual Studio Code to create React based websites and headed production of the Javascript components involved.

Aaron Miller Computer Solutions, Seattle, WA —Owner/Operator

May 2008 – PRESENT

Developed and directed work on website construction for all clients, including initial meetings, concept diagrams, design approval, final project implementation and subsequent website optimization and maintenance.

University of Washington Coding Bootcamp, Seattle, WA —Student

May 2019- August 2019

Attended a fast paced course dedicated to designing and building web applications in order to broaden my technical expertise, with a specific focus on advanced JavaScript and React.js. Technologies covered included HTML5, CSS3, SASS, JavaScript, jQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars JS, React Native & React.js

SKILLS

- Adept at meeting with clients and articulating their desires into a final project, including stylistic decisions and expected timeframe.
- Production of modern web applications using React Native.
